

## Judge Us By Our Cover

### SuperCloth® Bookbinding Fabrics

Publishers and printers agree, when it comes to binding the cover and spine of a hard covered book, SuperCloth® is the material of choice. A starched, open weave gauze cloth similar to cheesecloth, SuperCloth® strengthens the construction of a book by reinforcing the spine as it joins the cover. Books which are exceptionally oversized, heavy or thick benefit most from the extra support SuperCloth® offers.

### Text B® is a #1 Bestseller

Text B®, our 100% woven cotton spine reinforcing fabric, is specifically engineered for bookbinding. Its reinforced tapes strengthen the spine making it one of the most sought after and trusted bindery materials in the industry. Its tensile rating meets NASTA/BMI Specifications for K-12 school books.

### We've Got You Covered

AF&F is the nation's leading manufacturer of starched fabrics specifically engineered for the bookbinding industry. We manufacture all standard grades of fabrics, as well as mid-grade fabrics on a customized basis.
